

Personal Cyber Protection  
Insurance

**Keeping you  
and your  
employees  
cybersafe.**

## The First Personal Cyber Insurance with an IT Risk Management solution in Singapore

There are no good stories from those who have experienced being hacked. Mobiles, laptops and other personal devices are incredibly vulnerable to cyberattacks.

With Delta's Personal Cyber insurance, we help you to bounce back after a cyberattack, and help you to prevent it happening in the first place.

Our IT specialists assist you with your device and home network to remedy any vulnerabilities that cyber criminals can exploit. The DynaRisk dark web monitoring tool gives you a step-by-step guide to improving the cyber security of you and your family. If you fall victim to an attack, our specialist claims partner, CyberScout will support you to get back up and running.

Businesses will significantly improve their corporate risk by investing in Percy for their employees, as staff become more engaged, cyber savvy, aware of the risks, and learn how to spot phishing and other common scams.

**Protects your devices,  
identity & finances**

**Includes the DynaRisk  
cyber protection tool**

**Gives you  
peace of mind**

## Cyber Crime in Singapore

**16,117** Cybercrime cases accounted for **43%** of overall crime in 2020

## Cyber Partners

## 1. DYNARISK MANAGEMENT

### What can I do to prevent a cyber attack in the first place?

We provide DynaRisk's Ultimate level of cyber protection, giving you the tools to assess your current risk with a personal cyber security score. You will be able to monitor credit cards and your family's personal devices and emails, and receive personalised to-do actions to improve your household's cyber security while DynaRisk continues scanning for vulnerabilities and identifying any data breaches.

## DYNARISK CYBER PROTECTION

The DynaRisk Ultimate plan provides vulnerability and breach scanning for 5 household devices, 5 emails, and monitoring of credit cards and phone numbers.

### Cyber Security Score

Similar to a credit score, DynaRisk's Cyber Security Score indicates how safe you are online by assessing over 70 personal risk factors. It's simple – the higher your score, the safer you are.

### Data breach monitoring

DynaRisk's intelligence team recovered over 882 million breached and leaked data records in the 2nd quarter of 2020 alone. They constantly monitor the Dark Web and will notify you immediately if they discover your personal data has been compromised and advise you of next steps.

## 2. UNAUTHORISED ONLINE TRANSACTIONS

### What if I have detected unauthorised transactions and my bank won't reimburse me?

We cover unauthorised online transactions from your primary personal bank account.

## 3. MOBILE BANKING PROTECTION

### What if I have lost my mobile and my mobile payment app has been compromised?

We cover for your financial loss from unauthorised use of your mobile payment following the loss or theft of your mobile device.

### Personalised Improvement Plan

A personalised dashboard with your Cyber Security Score, a list of tailored actions designed to help improve your online safety.

### Email alerts on discovered cyber security threats

Receive emails about the latest cyber threats and alerts when a new breach or threat has been discovered.

## WHEN YOU'VE BEEN A VICTIM OF AN ATTACK

CyberScout is a global award-winning cyber triage service with 45 million individuals covered across 45 countries.

They provide a cyber helpline with proactive advice and incident remediation. They will resolve issues, notify authorities, liaise with banks, file reports, secure accounts and assist you throughout your claim.
